

Getting started!

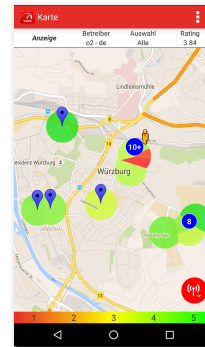

Step 1

Download the YoMoApp here or search in the Google Play Store after 'yomoapp'. Accept the end user license agreement and share your location.

Step 2

Watch videos in YouTube and rate the quality of the streaming. After closing YouTube your data is anonymously uploaded to an external database.

Step 3

Use the map to compare your network with others. The map is generated from the uploaded data of all users.

About YoMoApp

What's YoMoApp?

With the YoMoApp (YouTube Monitoring App) you can normally watch YouTube videos and rate the quality of the streaming. With the map you can then see how good your own network and other networks work at different places in Würzburg and other locations. Thus, the different providers can be compared easily and you can directly see where the mobile network works well and where it has to be improved.
